Summary of the number in Supplementary Information

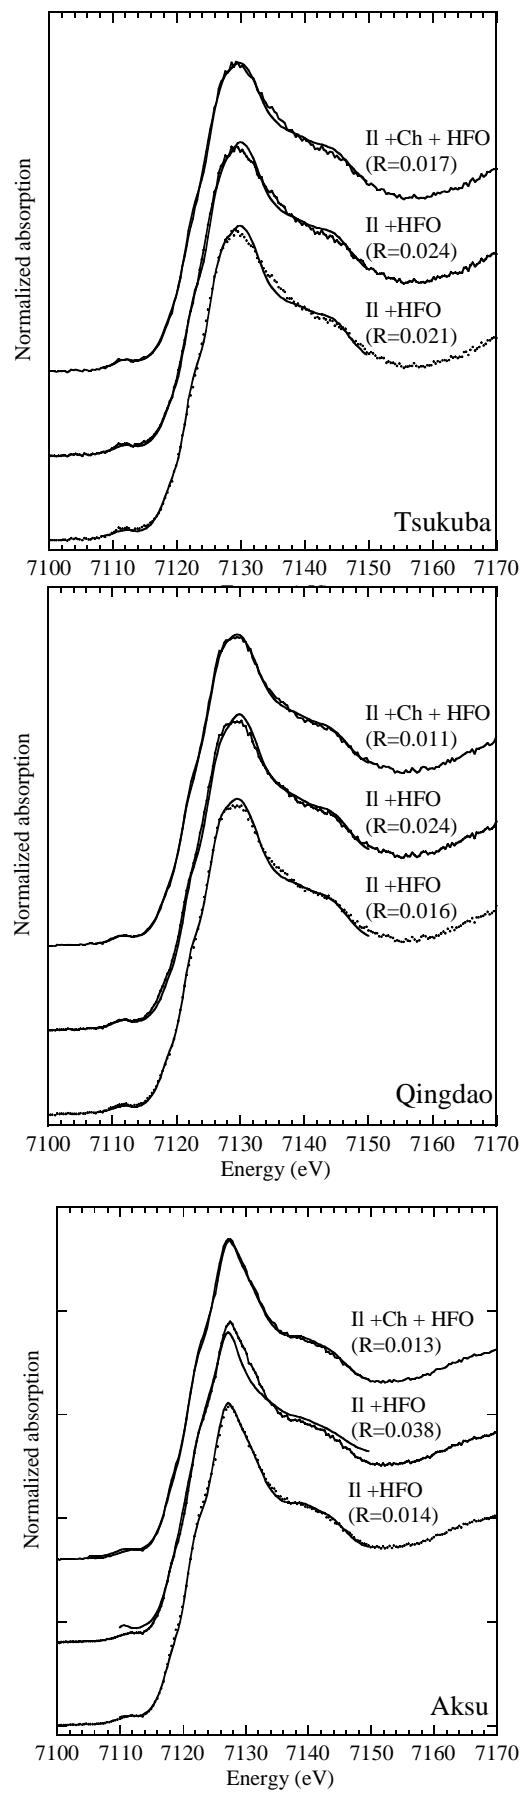

- the number of pages: 7 (including this sheet)
- the number of figures: 4
- the number of table: 3

**Table S1. Sampling sites and periods.**

Station	Location	Latitude (N), Longitude (E)	Height (meters above S. L.)	Sampling Period (low-volume)	Sampling Period (high-volume)
Aksu	The Aksu Water Budget Experiment Station, Chinese Academy of Science	40°37', 80°44'	7	15–21 March, 2002	15–18 March, 2002
Qingdao	Ocean University of China	36°07', 120°33'	80	20–23 March, 2002	
Tsukuba	Geological Survey of Japan	36°06', 140°14'	44	20–31 March, 2002	20–26 March, 2002

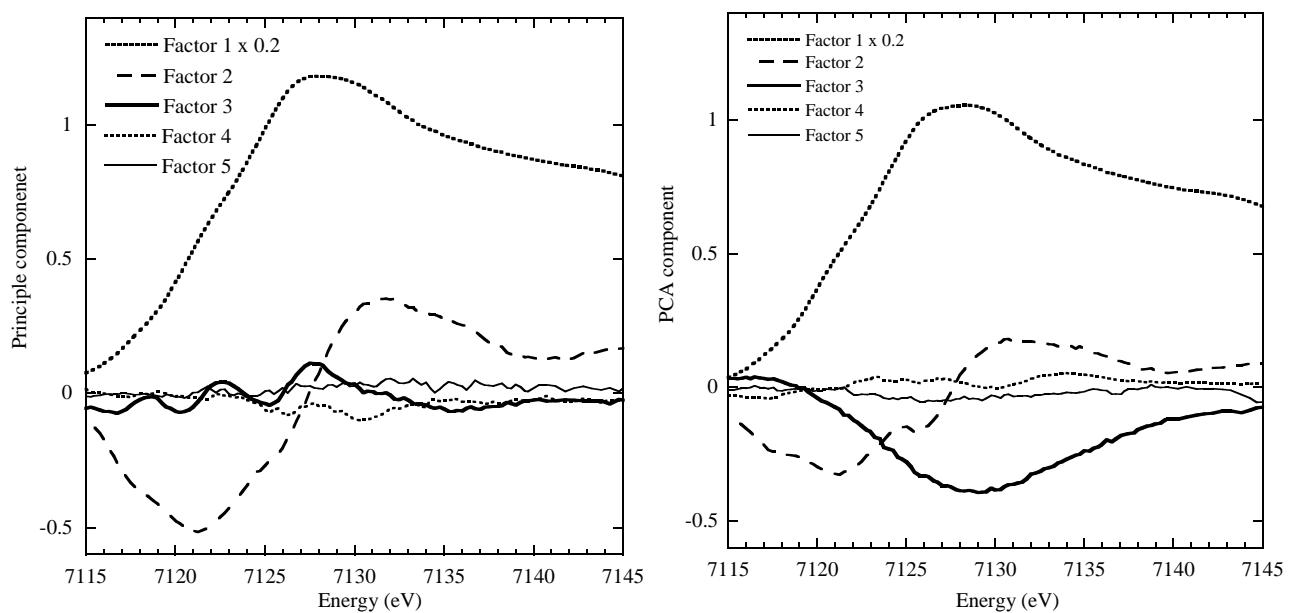

**Figure S1. (a) Normalized Fe K-edge XANES and (b) normalized  $k^3$ -weighted EXAFS spectra for various reference materials.** 1 hematite ( $\alpha\text{-Fe}_2\text{O}_3$ ); 2 ferrihydrite; 3 goethite ( $\alpha\text{-FeOOH}$ ); 4 Fe(III) oxalate; 5 Fe(III) citrate; 6 Fe(III) sulfate; 7 smectite (SWy-2); 8 illite (IMt-1); 9 magnetite ( $\text{Fe}_3\text{O}_4$ ); 10 Fe (II) oxide; 11 chlorite (CCa-2); 12 Fe(II) sulfate; 13 fayalite ( $\text{Fe}_2\text{SiO}_4$ ); 14 siderite ( $\text{FeCO}_3$ ); 15 pyrrhotite ( $\text{Fe}_7\text{S}_8$ ); 16 pyrite ( $\text{FeS}_2$ ). SWy-2, IMt-1, and CCa-2 were obtained from the Source Clays Repository of the Clay Mineral Society.

**Figure S2. Examples of fitting of XANES spectra for aerosols collected in Aksu, Qingdao, and Tsukuba, showing that three components are needed to fit the spectra. Il: illite; Ch: chlorite; HFO: ferrihydrite.**

**Table S2. Results of Fe speciation (mol%) in aerosols by fitting of XANES and EXAFS spectra (FY mode) with the R values. The results for XANES measured in CEY mode are also presented.**

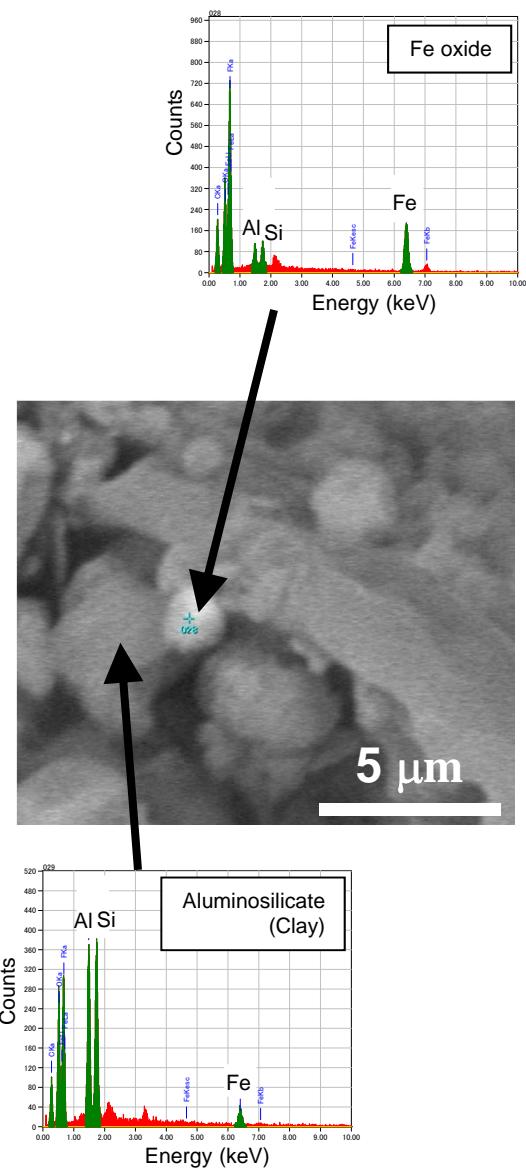

Aksu, FY mode					Aksu, CEY mode				
Stage	Illite	Chlorite	Ferrihydrite	R value (%)	Stage	Illite	Chlorite	Ferrihydrite	R value (%)
