

26 Table S1. Description of PMF solution

No. of factors	Q/Q _{exp}	Description of solution
2	5.02	Too few factors, large residual, more than one OOA-like factors, MS appear mixed
3	4.32	Too few factors, much higher m/z 44 in HOA factor than source spectra of primary OA, e.g., diesel and gasoline emissions.
4	3.85	HOA, COA, SV-OOA, and LV-OOA factors resolved, but the physically-meaningful NOA factor was not identified.
5	3.57	HOA, COA, SV-OOA, LV-OOA, and NOA factors found.
6-8	3.19-3.38	SV-OOA splitting evident. Similar spectra and time series
