Table C1: Sites used in this study and their categorisation.....	66

3 Observed annual and seasonal trends

A compilation of loess trends of monthly mean O₃ for all stations in this study are given in Figure ?? and Table ?? in addition to annual 5th and 95th percentiles of O₃. 75% coverage of monthly data was required to calculate statistics.

Trend tables summarising trends in annual mean, 5th and 95th percentiles for 158 European measurement sites are give in Tables ?? - ??, respectively. A compilation of seasonal cycles from daily mean, 5th, and 95th percentiles of O₃ for all stations in this study are given in Figure ???. Trend tables summarising trends in seasonal (winter [DJF], spring [MAM], summer [JJA] and autumn [SON]) mean, 5th and 95th percentiles for 158 European measurement sites are give in Tables ?? - ??, respectively.

4 CHIMERE model trends

A compilation of loess trends of monthly mean O₃ for data extracted from CHIMERE CTM at the locations of all stations in this study are given in Figure ?? in addition to annual 5th and 95th percentiles of O₃. 75% coverage of monthly data was required to calculate statistics.

Quantification of trends in annual mean, 5th and 95th percentiles for data extracted from CHIMERE CTM at the locations of all stations in this study are given in Tables ?? - ??, respectively.
