In the paper “Strongly sheared stratocumulus convection: an observationally based large-eddy simulation study” (published in Atmos. Chem. Phys., 12, 5223–5235, doi:10.5194/acp-12-5223-2012, 2012), the third- and second-moment of vertical velocity (w) are, at numerous places, erroneously printed as $\overline{w'^3}$ and $\overline{w'^2}$, and should be denoted as $\overline{w'^3}$ and $\overline{w'^2}$, respectively. We apologize for any confusion this may have caused.
