The article “Stratospheric geoengineering impacts on El Niño/Southern Oscillation” published in Atmospheric Chemistry and Physics, 15, 11949–11966, 2015, had errors in Table 2. The corrected table, in part d, omits IPSL-CM5A-LR from the list of G4 participants, omits MPI-ESM-L from the list of G4 participants, and corrects the number of G4 HadGEM2-ES ensemble members from (1) to (3). There were no IPSL-CM5A-LR or MPI-ESM-LR G4 runs at the time this paper was published and therefore no IPSL-CM5A-LR or MPI-ESM-LR G4 runs were used in our analysis. We also correct typos in the name of GISS-E2-R in parts a and b.

The table below correctly identifies the models that were used in our analysis. We regret the error.

Table 2. Models analyzed in each experiment. Asterisks indicate that the models were excluded from comparison due to unrealistic ENSO variability. The number of ensemble members for each experiment is given in parenthesis after the model name.

a. Models in G1	b. Models in G2
