Table S1. Air quality control measures for APEC China 2014 ^a.

Target sources	Description of control measures
Vehicles controls	<ol style="list-style-type: none">1. Local vehicles: odd-even plate number rule was implemented in Beijing;2. Non-local vehicles: not allowed to drive throughout Beijing;3. Cargo trucks: not allowed to drive inside the sixth ring.
Industrial source controls	<ol style="list-style-type: none">1. High emissions factories and power plants: halted from production or cut their productions by 30% in Beijing and surrounding provinces;2. Construction sites: halted from operating in Beijing.
Solvent source controls	<ol style="list-style-type: none">1. Businesses of paint and solvent use: required to operate under sealed conditions, or totally halted from operating in Beijing and surrounding provinces.
others	<ol style="list-style-type: none">1. Declared a holiday for public-sector employees in Beijing.
