In the aforementioned article, two formulae, Eqs. (2) and (3), were misprinted. The corrected equations read as

$$\overline{\delta^B} = [1 - \cos \Phi]^{-1} \int_0^\Phi \delta^B \sin \alpha \, d\alpha, \tag{2}$$

$$\delta = -R_p + R \cos \beta + \sqrt{(R \cos \beta)^2 - R^2 + d^2}. \tag{3}$$

These errors appeared only in the text of the article, and the results presented in the article remain intact.
