

Acronym	Description
CDNC	Cloud droplet number concentration within clouds
CDNC <sub>SW</sub>	Cloud droplet number concentration average in the southwest quarter circle of each cyclone composite; note that southern hemispheric cyclones are flipped so that their orientation is consistent with northern hemispheric cyclones
CF	Cloud fraction
CLWP	Cyclone liquid water path, defined as the sum of precipitating and non-precipitating liquid
LWP	Liquid water path, the integrated mass concentration of liquid in a column of atmosphere
$N_{acc}$	Accumulation-mode aerosol number concentration
SW	Shortwave radiation
SZA	Solar zenith angle
WCB	Warm conveyor belt
WVP	Water vapor path
