Seasonality over Southeast China

- Rice emissions
- Number of GOSAT observations
- Number of TROPOMI observations

Methane emissions [Tg mon$^{-1}$] vs. Month

Number of observations $\times 10^4$ vs. Number of observations

Values:
- Methane emissions range from 0 to 3 Tg mon$^{-1}$
- Number of observations range from 0 to $6 \times 10^4$

Graph displays seasonal variation in methane emissions and observation numbers.
