## **Supplementary material**

Figure S1. EMEP4UK (2018) model runs for 4 planting scenarios showing isoprene emissions (top row), the difference in emissions between planting scenario and base case (middle row) and the percentage difference in emissions between planting scenarios and base case (bottom row)

Table S1. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly isoprene emissions for UK

Figure S2. EMEP4UK (2018) model runs for 4 planting scenarios showing total monoterpene emissions (top row), the difference in emissions between planting scenario and base case (middle row) and the percentage difference in emissions between planting scenarios and base case (bottom row)

Table S2. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly total monoterpene emissions for UK

Table S3. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly ozone concentrations for UK

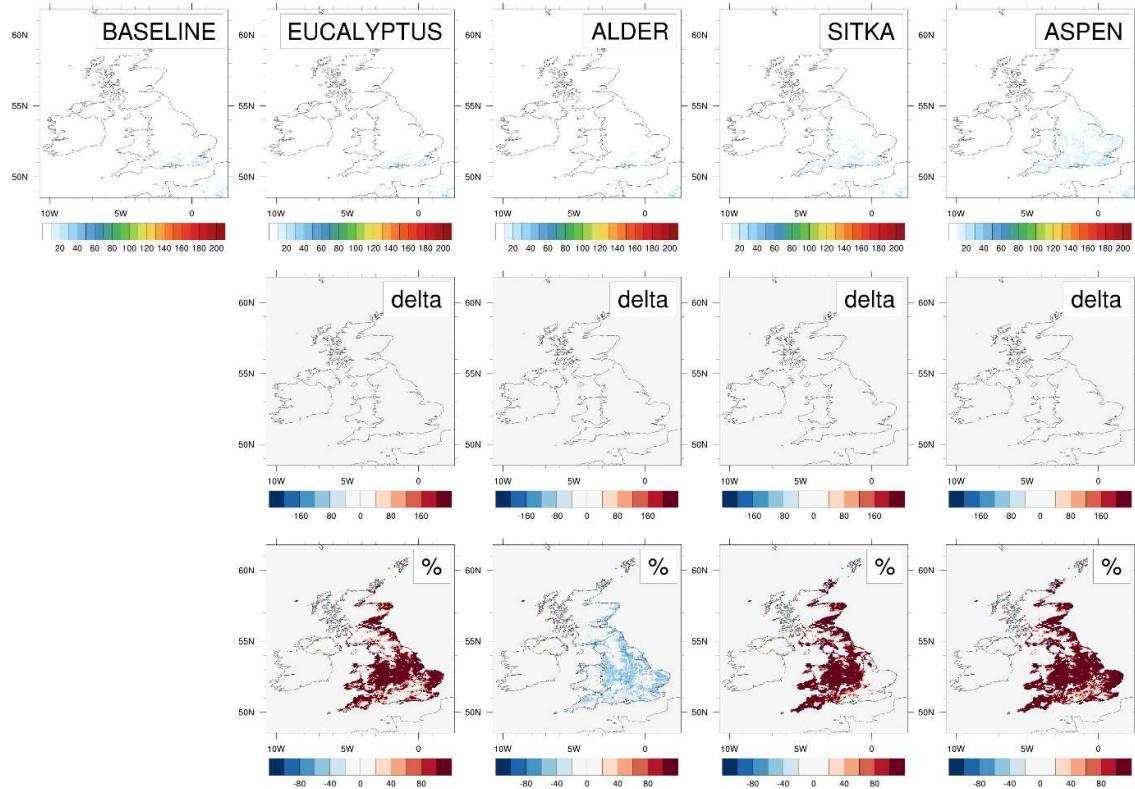

Table S4. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly PM<sub>2.5</sub> concentrations for UK

Table S5. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly SOA concentrations for UK

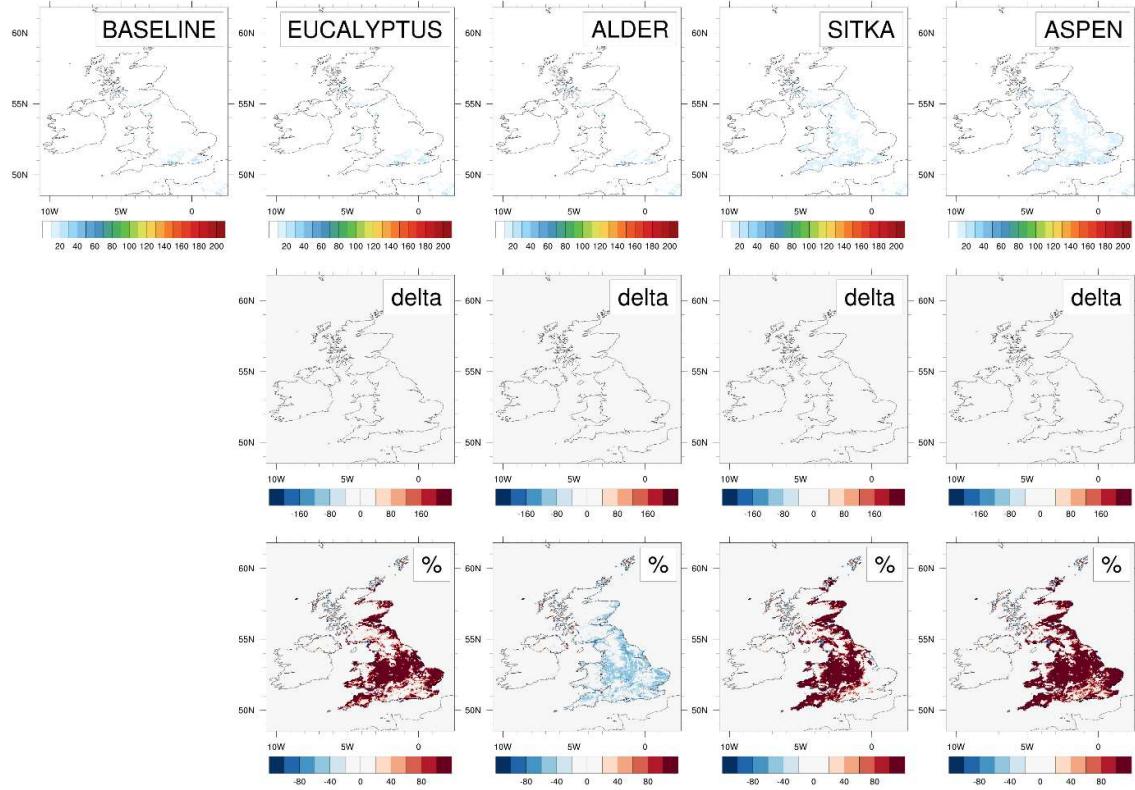

Table S6. Uncertainties of isoprene ( $E_{iso}$ ) and monoterpene ( $E_{mtp}$ ) emissions used in the model scenarios for alder, aspen, sitka spruce and eucalyptus and taken from experimental data in Purser et al, 2021.

Figure S1. EMEP4UK (2018) model runs for 4 planting scenarios showing isoprene emissions (top row), the difference in emissions between planting scenario and base case (middle row) and the percentage difference in emissions between planting scenarios and base case (bottom row)

Table S2. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly total monoterpenes emissions for UK

	Total monoterpenes (kt)	Baseline	Alder	Aspen	Eucalyptus	Spruce
Jan	4.97	5.44	4.66	6.36	10.43	
Feb	4.34	4.66	4.04	5.36	8.58	
Mar	5.54	5.91	5.11	6.8	10.86	
Apr	8.18	8.17	7.36	10	15.91	
May	12.69	13.52	11.81	15.49	24.18	
Jun	16.26	17.18	15.05	19.55	30.35	
Jul	20.31	21.26	18.41	24.4	38.15	
Aug	15.95	16.87	14.52	19.46	30.67	
Sep	11.73	12.33	10.65	14.21	22.44	
Oct	8.76	8.72	7.94	10.91	17.44	
Nov	6.49	7.02	6.05	8.12	13.07	
Dec	5.55	6.1	5.21	7.13	11.77	

Table S3. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly ozone concentrations for UK

	UK mean ozone concentrations (ppb)	Baseline	Alder	Aspen	Eucalyptus	Spruce
Jan	26.72	27.10	27.13	27.16	26.84	
Feb	30.24	30.73	30.77	30.79	30.41	
Mar	35.17	35.44	35.50	35.46	35.11	
Apr	38.16	38.93	39.05	38.86	38.48	
May	39.35	39.28	39.37	40.62	40.23	
Jun	34.15	34.35	34.72	35.94	35.60	
Jul	31.74	32.15	32.70	33.81	33.45	
Aug	28.58	28.67	28.80	29.90	29.46	
Sep	29.72	29.84	29.85	30.90	30.36	
Oct	26.62	27.30	27.32	27.48	27.06	
Nov	22.47	23.06	23.10	23.05	22.73	
Dec	22.39	22.93	22.97	22.93	22.61	

Table S4. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly PM<sub>2.5</sub> concentrations for UK

	UK mean baseline PM <sub>2.5</sub> concentrations ( $\mu\text{g m}^{-3}$ )				
	Baseline	Alder	Aspen	Eucalyptus	Spruce
Jan	6.98	6.71	6.70	6.65	6.71
Feb	6.39	6.18	6.16	6.12	6.16
Mar	8.26	7.94	7.92	7.84	7.92
Apr	9.85	9.28	9.22	9.09	9.33
May	9.02	7.90	7.59	8.18	8.53
Jun	6.17	5.56	5.34	5.79	6.05
Jul	4.35	3.95	3.79	4.14	4.45
Aug	3.14	2.90	2.81	2.99	3.13
Sep	3.93	3.55	3.45	3.69	3.83
Oct	6.69	6.37	6.29	6.35	6.45
Nov	11.65	11.36	11.34	11.25	11.30
Dec	8.11	7.87	7.84	7.79	7.85

Table S5.. EMEP4UK (2018) model runs for baseline and 4 planting scenarios showing monthly SOA concentrations for UK

	UK mean SOA concentrations ( $\mu\text{g m}^{-3}$ )				
month	Baseline	Alder	Aspen	Eucalyptus	Spruce
Jan	0.001	0.001	0.001	0.001	0.001
