

Supplement of

The contribution of fires to PM_{2.5} and population exposure in the Asia Pacific region

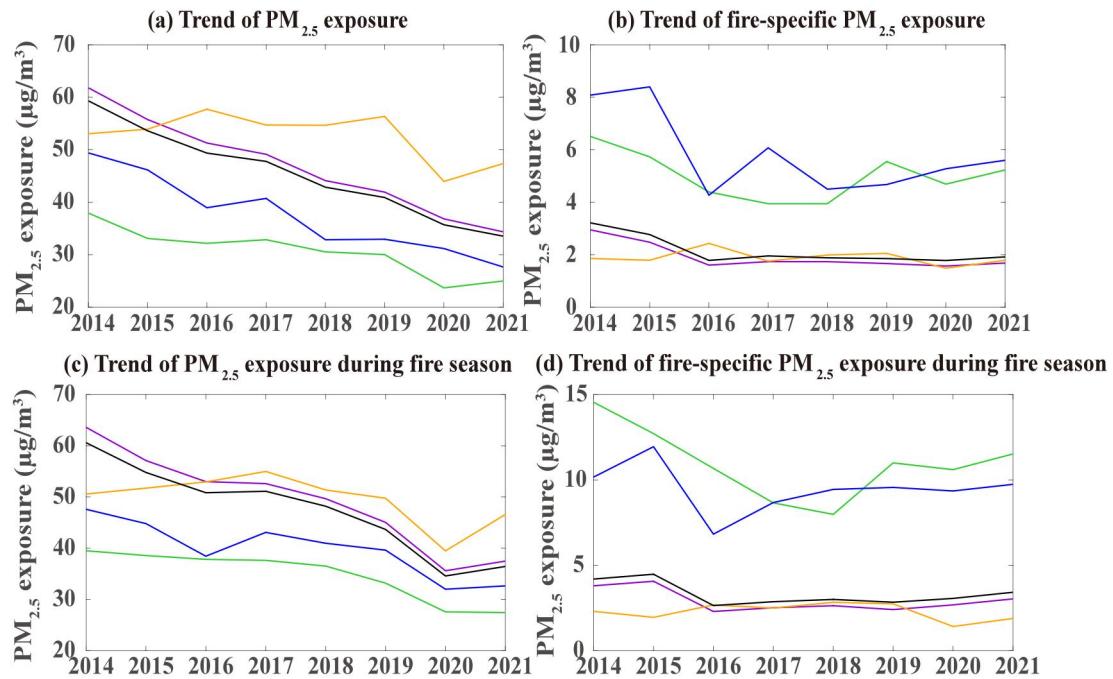

Figure S1. Temporal variations of (a) annual mean $\text{PM}_{2.5}$ exposure and (b) annual mean fire-specific $\text{PM}_{2.5}$ in different regions; (c)(d) similar to (a)(b), but for fire season mean.

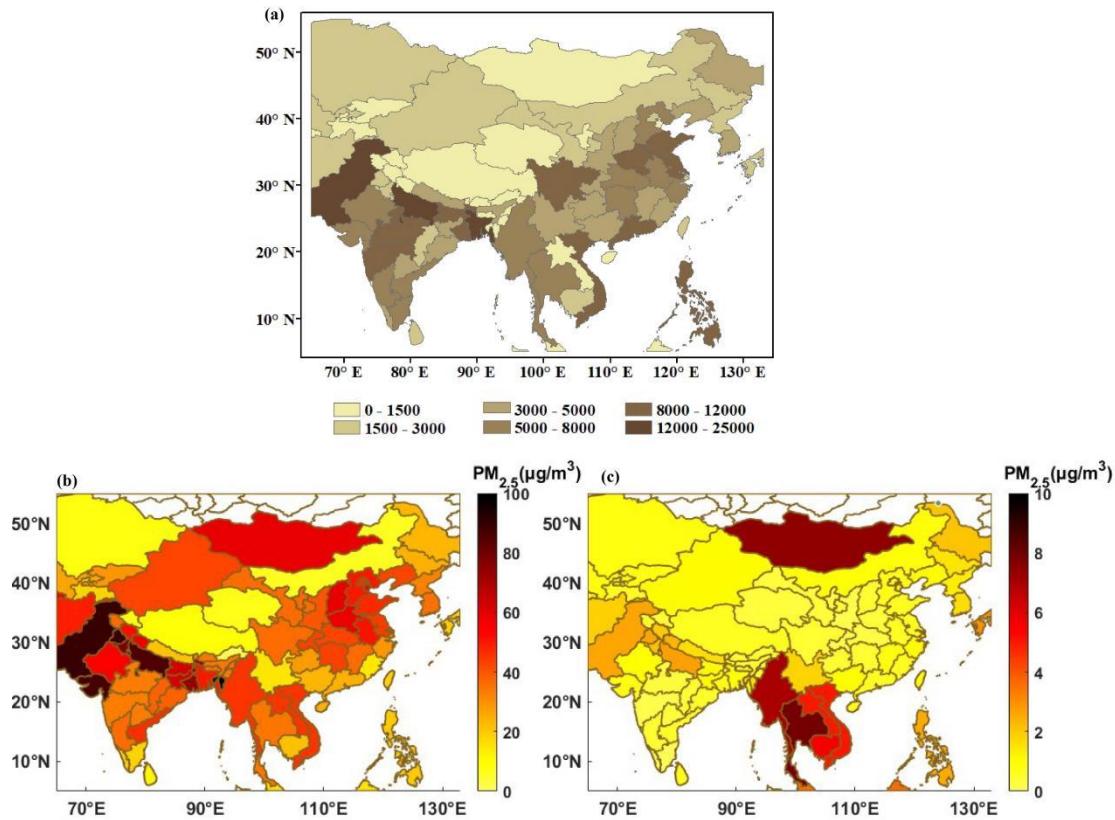

Figure S2. Temporal variations of (a) populations ($\times 10^4$) and (b) annual mean $\text{PM}_{2.5}$ in different regions; (c) annual mean fire-specific $\text{PM}_{2.5}$.

Table S1. Fit parameters for IER model
