Supplement

Figure S1: (left) Same as Fig. 1 but the CUPI-G and CPCB sites are depicted as white circles and colored squares (indicating station numbers as listed in Table S1), respectively. (right) Enlarged view of (left) near Delhi NCR. Sites only in Delhi are categorized as Delhi for the site-mean values of CPCB, whereas nearby sites such as (24) Gurugram, (25) JNU, and (28) Faridabad are included as Delhi NCR for the site-mean values of CUPI-G, following the definition of Singh et al. (2023) (See Figs. 3, 4, and 5). The AERONET stations are marked as the pink star (Lahore) and the yellow star (Amity University Gurgaon). The blue star is the Indira Gandhi International (IGI) Airport station of CPCB.

Table S1: List of CPCB and CUPI-G stations used in the study. Selected sites are marked with station numbers for PM_{2.5} and CO in respective columns.

	Name	Long.	Lat.	PM _{2.5}	CO	Category

Figure S2: Same as Fig. 3 but for (left) selected stations and (right) all stations.

Figure S3: Same as Fig. S2 but for CO concentrations (ppbv) of CPCB stations.

Figure S4: Spatial distribution of (top to bottom) daily mean GFAS CO emissions, MODIS AOD, MODIS Cloud Fraction, TROPOMI UV Aerosol Index, simulated surface concentrations of anthropogenic $PM_{2.5}$, simulated surface concentrations of CRB $PM_{2.5}$ using OFEv1.0 from October 27 to 31, 2022. The simulated surface wind vectors are also shown in the $PM_{2.5}$ maps. The Terra descending mode data (10:30 local time) is shown for MODIS. The time periods of the TROPOMI orbit shown in the figures are approximately 6:30–9:30 UTC (12:00–15:00 IST). The simulation time is 6:00 UTC (11:30 IST).

Figure S5: Same as Fig. S4 but from November 1 to 5, 2022.

Figure S6: Same as Figs. S4 and S5 but from November 6 to 10, 2022.

Figure S7: Same as Figs. S4–S6 but from November 11 to 15, 2022.

Table S2: Obtained x_m values for all temporal and areal rags.

Figure S8: Time series of (black) AERONET observed and (red and pink) simulated AOD at 500 nm at (left) Lahore and (right) Amity University Gurgaon stations from November 1 to 15, 2022 (00:00 UTC). The red and pink lines indicate “Optimized” and “GFAS” runs, respectively.

Figure S9: Vertical profiles of (black) In-service Aircraft for a Global Observing System (IAGOS) observed and simulated (red) optimized using OFEv1.0 run and (blue) No_CRB run concentrations of (above) CO and (below) O₃. Times are in IST. The surface air concentration data measured at the CPCB IGI airport site are marked as triangles.
