

Interactive comment on “Atmospheric ions and nucleation: a review of observations” by A. Hirsikko et al.

A. Hirsikko et al.

anne.hirsikko@helsinki.fi

Received and published: 30 November 2010

We would like thank R. Jayaratne for his comments. Unfortunately, we observed the recent paper by Jayaratne et al. (Ions in motor vehicle exhaust and their dispersion near busy roads, Atmos. Environ., 44, 3644-3650, 2010) just after submitting our manuscript. We will definitely include this information, when making corrections and changes in our manuscript for Atmospheric Chemistry and Physics.
