Interactive comment on "A theoretical study on UV-spectroscopy, electronic structure and reactivity properties of sesquiterpenes" by S.-X. Hu et al.

Anonymous Referee #2

Received and published: 15 December 2010

This work provides little insight into the atmospheric chemistry of sesquiterpenes and their roles in SOA formation. As such, I do believe that it does not fit into the scope of ACP. Furthermore, none of their responses to the reviewers' comments was satisfactory. I do not support publication of this paper in ACP.
