

***Interactive comment on “Nonlinear response of ozone to precursor emission changes in China: a modeling study using response surface methodology” by J. Xing et al.***

**Anonymous Referee #2**

Received and published: 6 February 2011

I have carefully reviewed the comments I had made to authors of the manuscript. The authors have taken my comments and improved the manuscript. They responded them correctly. The manuscript is in the subject of the progress. It has been a good reference which is missed between science and policy making process for a long while. I suggest the manuscript should be accepted for the publication of the ACP.
