Interactive comment on “Statistical dynamics of equatorial waves in tropical radiosonde wind data” by T.-Y. Koh et al.

T.-Y. Koh et al.

kohty@ntu.edu.sg

Received and published: 1 July 2010

The caption of Fig A1 should read as,

"...for equivalent depths of 20 m (solid), 50 m (dashed), 100m (dotted) and 200 m (dash-dotted)."

The graphs in the figure are correctly drawn and the text in line 3 of page 16367 is correct.

We apologize for the oversight.
