## ***Interactive comment on “Global analysis of the relation between aerosols and short-lived trace gases” by J. P. Veefkind et al.***

**Anonymous Referee #1**

Received and published: 11 August 2010

As best I can tell, the authors already took all the suggestions I made in my earlier review. They amounted to only minor suggestions.

As far as I'm concerned, the paper is in fine shape for publication as it stands. No further comments.
