Manuscript: Worldwide atmospheric mercury measurements: a review and synthesis of spatial and temporal trends, by F. Sprovieri, N. Pirrone, R. Ebinghaus, H. Kock, and A. Dommergue

The manuscript gives a very good summary of current status of mercury measurement in ambient air over the world. By reading through the manuscript, I found that a few recent measurement data carried out in China were not included in the manuscript. Here is the list of publication that I do believe should be included in this review.
