

Interactive comment on “Glyoxal vertical columns from GOME-2 backscattered light measurements and comparisons with a global model” by C. Lerot et al.

Anonymous Referee #1

Received and published: 24 October 2010

This paper contributes to understanding the nature of CHOCHO signal - especially over the oceans by improving the quality of measurements. The authors have embodied the recommendations of the referee and the reviewers in their script. The overall presentation is clear and well structured. I totally agree for the publication of this paper on ACP.
