3	Soil-Air Exchange Controls on Background Atmospheric Concentrations of
4	Organochlorine Pesticides
5	
6	Ana Cabrerizo ¹ , Jordi Dachs ¹ *, Kevin C. Jones ² Damià Barceló ¹
7	
8	Annex 1. List of figures.
9	Figure S1. Map of selected background areas4
10	Figure S2a-Examples of back trajectories for selected sites for α-HCH5
11	Figure S2b. Examples of back trajectories for selected sites for γ -HCH6
12	Figure S2c. Examples of back trajectories for selected sites for p,p'-DDD7
13	Figure S3. Ambient air fugacity*10 ¹⁰ for selected sampling sites of the Ebro
14	river basin (Spain) for Organochlorine Pesticides
15	Figure S4. Log Cs (soil concentration in ng gdw^{-1}) versus Log f_{OC} for selected
16	HCH isomers and DDT metabolites
17	Figure S5. Soil fugacity (Log fs*10 ¹⁰) regressed against 1/T10
18	Figure S6. Log K_{OCA} regressed versus Log K_{OA} for different sampling sites in
19	Spain (Ebro) and UK (Hazelrigg and Langden)11
20	Figure S7. Examples of Log K _{OCA} regressed against 1/T12
21	Figure S8a. Log fugacity in soil (fs) versus log fugacity in air (fa) for individual
22	HCHs isomers and DDT metabolites for sampling sites in Spain13
23	Figure S8b. Log fugacity in soil (fs) versus log fugacity in air (fa) for individual
24	HCHs isomers and DDT metabolites for sampling sites in UK14

Annex 2. List of tables:

26	Table S1: Sampling sites and sampling details. 15
27	Table S2a. Ambient air concentration (mean±SD) in ng m ⁻³ , ambient air
28	temperature and precipitation for Ebro sampling sites in June 2006. <loq: data<="" td=""></loq:>
29	below quantification limit16
30	Table S2b. Ambient air concentration (mean±SD) in ng m ⁻³ , ambient air
31	temperature and precipitation for Ebro sampling sites in November 2006. <loq:< td=""></loq:<>
32	data below quantification limit17
33	Table S2c. Ambient air concentration (mean±SD) in ng m ⁻³ , ambient air
34	temperature and precipitation for Ebro sampling sites in September 2007. <loq:< td=""></loq:<>
35	data below quantification limit
36	Table S2d. Ambient air concentration (mean±SD) in ng m ⁻³ , ambient air
37	temperature and precipitation for UK sampling sites. <loq: below<="" data="" td=""></loq:>
38	quantification limit
39	Table S3a. Soil concentration in (ng g dw ⁻¹) and soil physico-chemical
40	properties (%TOC: soil organic carbon, %N: soil nitrogen, Soil T: Soil
41	temperature, soil pH, soil redox, soil water content (SWC) and site altitude for
42	selected sites along the Ebro river basin. <loq: below="" cuantification="" data="" limit,<="" td=""></loq:>
43	Nd: not measured data due to sensor problems. Na: non-available
44	data20
45	Table S3b. Soil concentration in (ng g dw ⁻¹) and soil physico-chemical
46	properties (%TOC: soil organic carbon, %N: soil nitrogen, Soil T: Soil
47	temperature, soil pH, soil redox, soil water content (SWC) and site altitude in
48	UK s sites. <loq: below="" data="" quantification<="" td=""></loq:>
49	limit

50	Table S4. Correlation coefficients for all soils
51	Table S5a. Soil fugacity regressed against f_{OC} ; a, b are the fitting parameters in
52	the equation Log fs=a +b(log f_{OC}) p the level of significance and N the number
53	of samples considered23
54	Table S5b. Soil fugacity regressed against f_{OC}/f_N ; a, b are the fitting parameters
55	in the equation Log fs=a +b(log f_{OC}/f_N) p the level of significance and N the
56	number of samples considered24
57	Table S5c. Soil fugacity regressed against pH; a, b are the fitting parameters in
58	the equation Log fs=a +b(pH) p the level of significance and N the number of
59	samples considered
60	Table S6a. K_{OCA} regressed against altitude; a, b are the fitting parameters in the
61	equation Log K_{OCA} =a +b(log altitude), p the level of significance, ne (not
62	enough data for statistic analysis) and N the number of samples considered25
63	Table S6b. K_{OCA} regressed against f_{OC}/f_N ; a, b are the fitting parameters in the
64	equation Log $K_{OCA} = a + b(\log f_{OC}/f_N)$, p the level of significance, ne (not enough
65	data for statistic analysis) and N the number of samples considered 25
66	Table S6c. K _{OC} regressed against soil pH; a, b are the fitting parameters in the
67	equation Log K_{OC} =a +b (pH), p the level of significance, ne (not enough data
68	for statistic analysis) and N the number of samples considered26

Table S6b. K_{OCA} regressed against $f_{OC}/f_{N;}$ a, b are the fitting parameters in the equation Log K_{OCA} =a +b(log f_{OC}/f_N), p the level of significance, ne (not enough data for statistic analysis) and N the number of samples considered.

	R ²	А	р	b	р	Ν
