Dear Pfal et al, Your paper is considered a valuable contribution to the modeling and analysis of water isotopes to interpret storms. This is a rapidly expanding field where new measurements are coming on line and high resolution analysis will be very valuable. We encourage you to address the reviewer comments and polish up the paper for final review so it can be published promptly and shared with the research community. Thanks for choosing to publish in ACPD and ACP and we are proud of our open access, transparent peer review and high impact factor in atmospheric physics and chemistry. Its my pleasure to read and edit your paper. Cheers! Dubey
