

Interactive comment on “Atmospheric chemistry and physics in the atmosphere of a developed megacity (London): an overview of the REPARTEE experiment and its conclusions” by R. M. Harrison et al.

W. T. Sturges (Editor)

w.sturges@uea.ac.uk

Received and published: 23 February 2012

The authors have carefully considered all of the comments received by the referees in their revision, including a shortening of the overall length. The referees were unanimously supportive of publication, subject to the corrections that they indicated in their public reviews. I am therefore pleased to accept the revised document (not available on this page: it will appear as a link to the final paper in due course).
