

Interactive comment on “Source apportionment of the summer time carbonaceous aerosol at Nordic rural background sites” by K. E. Yttri et al.

C. Publications

publications@copernicus.org

Received and published: 16 June 2011

Due to a mistake in the typesetting process, the section numbering from Section 6.3 onward was changed. Section 6.3 was changed to Section 7, which consecutively changed the numbering in the rest of the paper. The correct way would have been to number all sections until the Conclusions as subsections of Section 6, and the Conclusions as Section 7. We are very sorry for this error and for any inconvenience that it caused.
