Interactive comment on “Singular vector decomposition for sensitivity analyses of tropospheric chemical scenarios” by N. Goris and H. Elbern

C. Publications

publications@copernicus.org

Received and published: 26 August 2011

Erroneously, instead of Fig. 4, Fig. 5 was inserted twice during the production process. Please find the correct Fig. 4 in the supplement.

Caption Fig. 4:

Statistics of optimal grouped singular vectors for categories Ca and Cb for scenario MARINE. Depicted are mean impact (blue bars), minimum/maximum value (dark blue lines) and standard deviation (red bars).

Please also note the supplement to this comment:
