Interactive comment on “Global and regional effects of the photochemistry of CH₃O₂NO₂: evidence from ARCTAS” by E. C. Browne et al.

Anonymous Referee #1

Received and published: 15 March 2011

It was pointed out to me that my first comment is not clear (re: comparing inferred values with model). I was referring to a point-by-point comparison with GEOS-Chem calculations. It indeed may not be useful, given the uncertainties driven by the varying precursor fields...just a curiosity question.
