 4 Symbols in column headings are defined as,

5 $\overline{w\theta}$ sensible heat flux measured by eddy covariance

6 ΔC_a upper – lower platform difference in atmospheric PBT concentration

7 $\Delta \theta$ upper – lower platform difference in potential temperature

6 Symbols in the column headings are defined as,

7 **k_{ol}** overall mass transfer velocity for air-water exchange

8 **H** temperature dependent Henry's law constant

9 **C_a** atmospheric PBT concentration

10 **C_w** aqueous PBT concentration
