When using a map that shows boundaries of European countries, please use the current and politically correct maps. Yugoslavia does not exist for more than 20 years now and it is both scientifically and politically incorrect to show realities of 20 and more years ago.

I suggest that you do not use country boundaries at all, it is sufficient to have stations' names with country abbreviation. It is not a busy map anyway.

Regards Sonja Vidic, Meteorological and Hydrological Service Zagreb, Gric 3
