

Interactive comment on “Comment on “Global risk of radioactive fallout after major nuclear reactor accidents” by J. Lelieveld et al. (2012)” by J. Lelieveld et al.

J. Lelieveld et al.

jos.lelieveld@mpic.de

Received and published: 25 September 2012

We thank Dr. Ehlermann for his comment and the information presented.

In our reply we need to focus on the aspects that are relevant to this manuscript. We refrain from a discussion about the causes of INES 7 accidents and the phase-out of NPPs in Germany, which are not addressed in our comment. We acknowledge that Dr. Ehlermann proposes deleting sentences from our original manuscript; however, this is not possible; and we also do not agree that this should be necessary, since the original statement only provided background information as documented in the media of that time, and is not posed as a political statement.
