We thank both reviewers for their detailed and constructive comments on our manuscript. The authors apologize for all the edition mistakes the referees find in the paper which were due to a LATEX compiling issues within the editing office. The first author should have noticed that before publication on the ACPD site. We have revised the manuscript attempting to take into account all the comments raised by both reviewers.

The answers to all comments are attached as a supplement

C8222

Please also note the supplement to this comment:
