This paper concerns technical details of aerosol retrieval. ACP has a science focus (see [http://www.atmospheric-chemistry-and-physics.net/general\\_information/journal\\_subject\\_areas.html](http://www.atmospheric-chemistry-and-physics.net/general_information/journal_subject_areas.html)).

AMT/AMTD was set up for papers on measurement techniques (amongst other things, see [http://www.atmospheric-measurement-techniques.net/general\\_information/journal\\_subject\\_areas.html](http://www.atmospheric-measurement-techniques.net/general_information/journal_subject_areas.html)). This is exactly what this paper is about. I strongly recommend the paper is withdrawn/rejected and is resubmitted to AMTD.
