***Interactive comment on* “Enhanced SOA formation from mixed anthropogenic and biogenic emissions during the CARES campaign” by J. E. Shilling et al.**

J. E. Shilling et al.

john.shilling@pnnl.gov

Received and published: 31 October 2012

We regret that an old version of Figure 4 was mistakenly published in the manuscript, which omitted the NO_x data discussed in the text. The correct version of Figure 4 is shown below.

Fig. 4. Organic particle mass, organic particle O:C, CO, ozone, NO_x, m/z 69 (isoprene), m/z 71 (MVK + MACR), and m/z 93 (toluene) concentrations for the morning and afternoon June 28th flights. Note there is a break in the time axis. The plume transects analyzed for Figure 5 are indicated by the dashed pink line

Fig. 1.
