Received and published: 1 November 2012

We again thank both reviewers for their help in improving the manuscript. In our two earlier author comments we have already responded to all questions and suggestions, so there is nothing else to add here. In parallel to writing the responses we have prepared a revised manuscript, which is almost ready for submission.

Interactive comment on Atmos. Chem. Phys. Discuss., 12, 21013, 2012.
