Thank you for your comment. We emphasize that subsection COSI of Sect. 3 describes the latest published version of the model, in the same way as this is done for other models. As already discussed with you in person several weeks ago, we will nevertheless include the Haberreiter et al. (2008) reference in the revised version.

Note that the term NLTE ODF was already used in earlier publications (i.e. in Hubeny & Lanz, ApJ, 439, 875-904, 1995).
