

Supporting Information (Drozd et al. 2013)

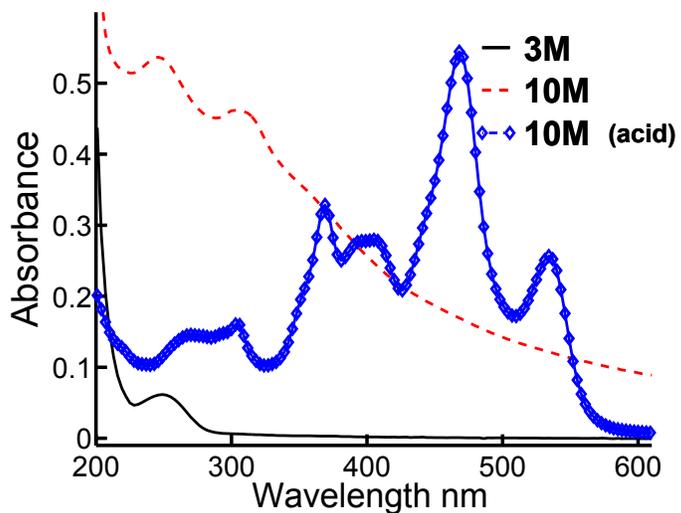

Figure S1. The UV-Vis spectrum of the products of gas-phase PO uptake to the surface of 10M (dashed, red) and 3M (solid, black) sulfuric acid solutions diluted with water. The spectrum (dashed, blue) of the products of uptake to 10M acid diluted with 10M acid is also shown (divided by a factor of 2.5).
