## ***Interactive comment on “Contributions of local and regional sources to fine PM in the megacity of Paris” by K. Skyllakou et al.***

**K. Skyllakou et al.**

spyros@chemeng.upatras.gr

Received and published: 26 December 2013

We do appreciate the comment. The Healy et al. (2013) paper was published after the completion of our work. Its results are obviously relevant to our study and provide additional independent support for our calculations. We have added the comparison of the model predictions with the Healy et al. (2013) observation-based estimates to our revised paper.
