

Interactive comment on “Oligomer formation within secondary organic aerosol: equilibrium and dynamic considerations” by E. R. Trump and N. M. Donahue

E. R. Trump and N. M. Donahue

etrump@andrew.cmu.edu

Received and published: 17 January 2014

24612, eq (5):C* should have index “m”

This has been corrected. Thank you.

24621, line 20: Where do I see the fast SOA formation process in Figure 3? It is formed from the beginning. I do not see an increase.

We removed the line referring to the SOA formation from the manuscript. You are correct that this was not shown in Figure 3.

Table 1: put C* in first column

Done.

Figure 2: The legend is too small. Could you make one large legend outside the graphs. Use also larger font size for axes labels and titles

We reformatted Figure 2 to respond to these suggestions.
