

Supplement

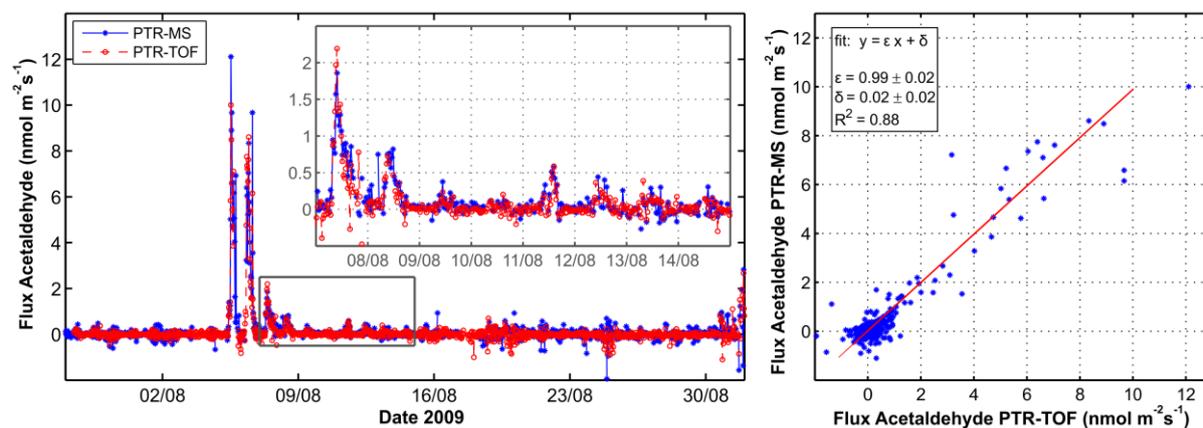

Figure S1. Comparison between acetaldehyde fluxes measured by PTR-TOF and fluxes measured by the PTR-MS (on m/z 45) for a time period from 28 July until 1 September 2009 together with a scatter plot specifying the regression parameters for a linear regression between both data sets ($F_{\text{PTR-MS}} = 0.99 \cdot F_{\text{PTR-TOF}} + 0.02$, $R^2 = 0.88$).
