Received and published: 17 February 2014

The paper is a welcome addition to the literature on aerosol measurements in the remote areas especially on the Tibetan Plateau. There was an improper use of the AERONET data for the prior version of the manuscript. Thanks to Prof. G. P. Gobbi, the work of the PIs of the AERONET sites has been appropriately credited, either by co-authorship or by acknowledgement, in the revised versions of the manuscript.

During the post-discussion review stage, the authors made additional major revision of their manuscript, as requested by the referee. With the permissions of the authors
