Interactive comment on “Atmospheric processing of iron carried by mineral dust” by S. Nickovic et al.

S. Nickovic et al.

snickovic@wmo.int

Received and published: 21 June 2013

We thank the reviewer for his positive evaluation for the manuscript. Here is our answer to his specific comments.

Specific comments:

1. Section 2.1 The equations in this section are not reproduced correctly in the PDF format. It appears that parts of the brackets are missing.
2. Section 2.2, Eq. (4) Same as in 1. above.
3. Section 2.3, p. 2701, line 9 Same as in 1. above.

4. Section 2.4, Eqs. (8)-(10) Same as in 1. above

In our PDF editor we do not see any of the errors listed above. Can the ACPD technical editor assist about that.

5. Section 3.2, p. 2707, line 1 “for the driving atmospheric model” rather than “for driving the atmospheric model?”

We corrected that.
