

Interactive comment on “Recommendations for the interpretation of “black carbon” measurements” by A. Petzold et al.

A. Petzold et al.

a.petzold@fz-juelich.de

Received and published: 23 June 2013

Dear Tom,

Thank you for your suggestion. However we decided to keep the recommendations in the text only in order to stay clear. Since the recommendations do not fit in full detail into the abstract, there might be confusion if there is a short version in the abstract and an extended version in the main text.

Best regards

Andreas
