

Similarities and differences of aerosol optical properties between southern and northern slopes of the Himalayas, by C. Xu et al. (ACPD 13, 20961–21002, 2013).

The AERONET data download conditions reported below have been accepted by the data user before downloading the EvK2-CNR data. This paper falls in the case “Publishing AERONET data from a 'few' sites”

I have no record of the paper authors consulting with the PI (myself) about the data to be used, neither fulfilling the guidelines on “Publishing AERONET data from a 'few' sites”. Before publication in ACP, I would ask the authors to honor these guidelines.

Gian Paolo Gobbi (EvK2-CNR instrument PI).

-----AERONET Download Site Notice to users:-----

The public domain data you are about to download are contributed by the International AERONET Federation. Each site has a Principal Investigator(s) (PI) , responsible for deployment, maintenance and data collection. The PI has priority use of the data collected at the site. The PI is entitled to be informed of any other use of that site data.

The Principal Investigator(s) of 'EVK2-CNR' is(are): **Gian_Paolo_Gobbi**. If you intend to use the following data please consult with him/her/them via e-mail(s) :

g.gobbi@isac.cnr.it

Recommended guidelines for data use and publication:

Although journal paper authorship and acknowledgement is the domain of the senior author and no policy is universally applicable, the AERONET contributors ask that every practical attempt be made to honor the following general guidelines.

Using AERONET data:

Please consult with the PI(s) of the data to be used.

Publishing AERONET data from a 'few' sites:

Please consider authorship for the PI(s) and/or the following acknowledgement:

We thank the (Project/PI) for (its/theirs) effort in establishing and maintaining (site name(s)) sites.

Publishing data from 'many' sites:

A general acknowledgement is typically sufficient and may read:

We thank the (PI investigators) and their staff for establishing and maintaining the (#)sites used in this investigation.

However if the AERONET data are a principal component of the paper then co-authorship to PI's should be offered.

If you accept the above conditions, please click the "Accept" button below to download the ZIP file. If you do not agree with the above conditions, click "Do Not Accept" to return to the data plots.
