Comment

Interactive comment on “Analysis of the PKT correction for direct CO₂ flux measurements over the ocean” by S. Landwehr et al.

S. Landwehr

s.landwehr1@nuigalway.ie

Received and published: 26 November 2013

Technical corrections

We were notified by the Referee John Prytherch, that most of the figures in the submission have missing – signs, in the legends, the labels and the axes tick labels. This was due to an error during the latex typesetting process, when the submitted *.eps figures files were converted to *.pdf. We apologize having overlooked this important details and supply the corrected figures for the discussion article below. (For technical reasons the figure captions are shortened.)
