

Review of the paper “Variability of the infrared complex refractive index of African mineral dust: experimental estimation and implication for radiative transfer and satellite remote sensing” by Di Biagio et al.

Submitted for publication on ACP

We would like to thank the Editor for having carefully read the paper, both at the early submission stage and after revisions, and provided valuable comments which helped to improve the quality and the readability of the manuscript. We have taken into consideration all the suggestions provided and changed the paper accordingly. We have also corrected some other minor things along the paper to make the text more clear.
