

Dear Dr. Chiu,

We appreciate to both referees and you, the time spent for reading the manuscript and our responses.

We have done minor corrections in the manuscript based on the Reviewer #1's report.

We have included the corrections suggested in the "Detailed Comments". Moreover, as he suggested in the "General Comments", we have read the manuscript once again in order to find other grammatical and wording problems that could be improved before the publication.

All the proposed modifications are marked in blue (new) and red (old).

We hope that these wording improvements could be appropriate.

Sincerely,

Alex Montornès
