

Dear Farahnaz Khosrawi,

Thanks for the quick response and your comments.

- Attitude is correct, see e.g: http://en.wikipedia.org/wiki/Attitude_control
That is, the term attitude refers here to the orientation and pointing of the SMILES and Odin-SMR instruments.

- Text has been added to describe how we define tangent altitudes in general, including negative ones. See lines 118-119.

- The two remaining points, covering typos, have been fixed. Thanks for spotting these.

Best regards,

Patrick Eriksson
