Message to the Editor:

The first three issues are the last issue are a problem of the style file provided by the Copernicus Office. It will be automatically solved when the tex file is recompiled directly at the Office.

As for the 4th issue, I assume you are referring to the section title of Sect. 3, and a lead sentence. However, I do not know how to deal with this issue. Thus, again, this must be left for the final process of technical editing.
