15  
16 **Supplementary material**

17 Figure S01. Composite sea level pressure (hPa) representing circulation types leading to ADO  
18 over the western Mediterranean basin.

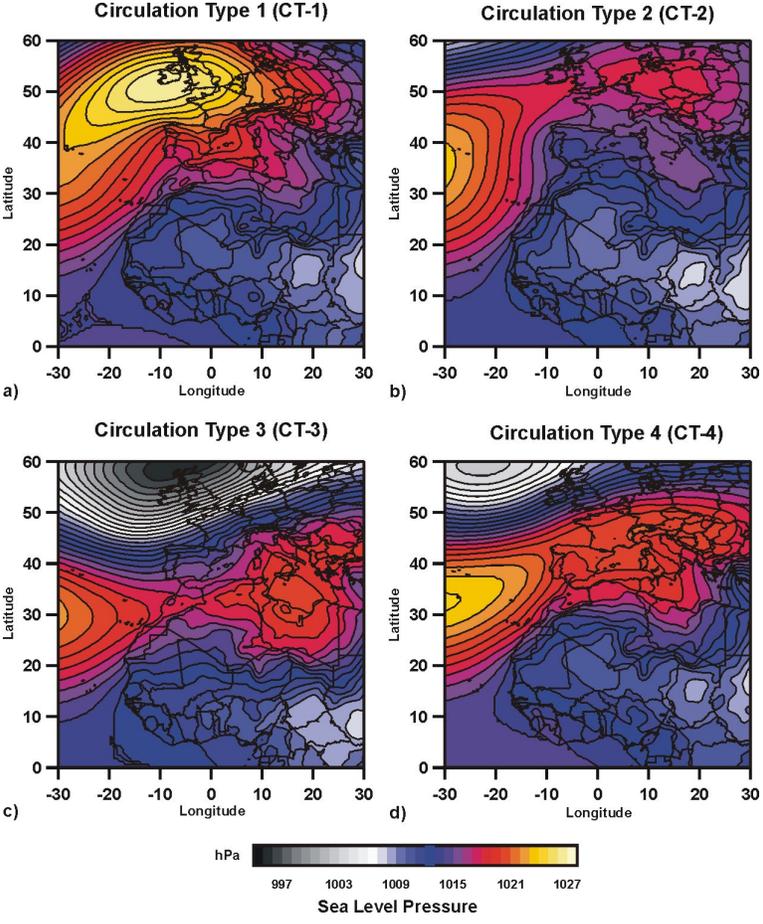

19  
20 Figure S02. Composite 700 hPa geopotential height (m) representing circulation types leading  
21 to ADO over the western Mediterranean basin.

22  
23 Figure S03. Redistributed concentration fields (RCF) for dust load in PM10, during the  
24 seasons with a higher frequency of occurrence for each circulation type leading to African  
25 Dust Outbreaks (ADO) over the western Mediterranean basin in the 2001-2011 period.
