

***Interactive comment on “Mesoscale modeling
study of the interactions between aerosols and
PBL meteorology during a haze episode in China
Jing–Jin–Ji and its near surrounding region – Part
1: Aerosol distributions and meteorological
features” by H. Wang et al.***

Anonymous Referee #1

Received and published: 7 January 2015

This manuscript presents the interesting modeling results on haze in China, and it could be published in the ACPD only with improving English usage.
