Received and published: 31 January 2015

This manuscript has received two sets of detailed comments from me before being accepted for ACPD and now has one detailed set of comments from a reviewer. I have been unable to engage another reviewer, but consider there to be enough in the existing review to allow me to reconsider the manuscript after revisions have been made and a reply made to the referees.

Interactive comment on Atmos. Chem. Phys. Discuss., 14, 29101, 2014.
