

***Interactive comment on “A comprehensive investigation on afternoon–evening transition of the atmospheric boundary layer over a tropical rural site” by A. Sandeep et al.***

**Anonymous Referee #1**

Received and published: 3 February 2015

The manuscripts has been improved and clarified and, to my opinion, is now suitable for publications, even though I still believe that explanation given for the top-down transition lacks generality. However, this paper could spur researchers in finding appropriate responses to this difficult problem.
